

PRIME MINISTER'S OFFICE TANZANIA INVESTMENT CENTRE

INVESTMENT PROJECTS SEEKING JOINT VENTURE PARTNERSHIP

2021

STATEMENT FROM THE EXECUTIVE DIRECTOR

I would like to introduce this Project Brief document which contains private sector and government projects being undertaken by respective companies and government institutions in Tanzania, seeking different forms of partnerships.

In this projects booklet, we profile Tanzania's lucrative projects and promote them to potential partners who will work with the respective companies or government institutions which supervises the particular projects.

This project guideline is expected to provide initial project information required by investors interested to invest in different portfolios in the country.

It is my expectation that potential investors will find this document a useful and important source of information for those who will be interested in the projects from respective sectors enlisted in this document.

Lastly, the Tanzania Investment Centre (TIC) would like to assure all prospective investors that we will continue to facilitate granting of various permits, approvals, authorizations and licenses for the proposed projects by relevant government authorities, through the one stop shop facilitation Centre.

I welcome you all.

A handwritten signature in blue ink, appearing to read 'I. Kazi', written in a cursive style.

Dr. Maduhu Isaac Kazi

MANUFACTURING AND PROCESSING

MANUFACTURING AND PROCESSING

S/N	ITEM	REMARKS
01	PROJECT NAME	TYRE MANUFACTURING FACTORY
	IMPLEMENTING AUTHORITY	National Development Corporation (NDC)
	LOCATION	Arusha Tyre Manufacturing Plant (formerly known as General Tyre East Africa Ltd (GTEA)) is located in Themti, Njiro Industrial Area within Arusha Municipality. The GTEA area covers 50.4 acres which is fenced. Developed land area is 42.9 acres which include administration block, factory plant and a recreation area. Remaining area is reserved for future factory expansion.
	SHORT DESCRIPTION	The Government has mandated NDC to revive the tyre manufacturing plant which has been transferred to NDC. Installed capacity of the plant is 320,000 tyres per annum. Several assessments and analysis has been conducted for purpose of reviving the plant. However, due to elapse of several years without the factory being into operational including the outdated technology used for manufacturing the tyre, it has been concluded that the tyre plant must be completely overhauled to put a modern and state of the art technology plant for tyre manufacturing. In this circumstance, a new tyre manufacturing plant have to be established to meet local demand and for export.
	PROJECT BENEFITS	<ul style="list-style-type: none"> ✓ To stimulate establishment of a chain of World class tyre manufacturing industry in the country ✓ Creation of employment and reduction of poverty ✓ To position Tanzania to trade into the region and globally ✓ Increase balance of payment in the country ✓ Reduce foreign currency expenditure
	PROJECT COST ESTIMATES	To be determined after completion of feasibility study.
	PROJECT STATUS	Preparation for conducting feasibility study including promotion of the project to secure a partner for joint collaboration in undertaking the study.
	FINANCING STATUS	Financing for project is being sought through PPP/JV arrangement
	CONTRIBUTION TO INCOME GENERATION AND/OR POVERTY ERADICATION	Tyre manufacturing for domestic and export market, hence income generation and local job creation.

S/N	ITEM	REMARKS
0 2	PROJECT TITLE	KILIMANJARO MACHINE TOOLS MANUFACTURING FACTORY (KMTC)
	IMPLEMENTING AUTHORITY	National Development Corporation (NDC)
	PROJECT DESCRIPTION	<p>KMTC is located in Hai District, Kilimanjaro Region, along Moshi – Arusha Road in Northern Tanzania. The factory is near to Kilimanjaro International Airport within the KMTC Industrial Park. KMTC was established in 1981 to manufacture metal and wood working machines. The Factory has been installed with range of manufacturing machines and equipment. The Government of the United Republic of Tanzania has mandated NDC to revamp the Factory.</p> <p>KMTC has an ample capacity of undertaking most of metal cutting operations in producing different types of engineering parts and machines. It has a large collection of metal cutting machines of various capacities that can be used to manufacture any industrial engineering part.</p>
	DEVELOPMENT PLAN (THREE PHASE)	NDC plans to strengthen KMTC in its manufacturing and equipment construction capability to be able produce various types of machines.
	PROGRAMME ALLOCATION	Tanga Development Corridor
	ECONOMIC SECTOR	Manufacturing
	EST CAPEX VALUE FOR REVIVAL	USD 28.9 Million
	PROJECT STAGE	Mobilisation of funds for revitalization of the factory
	CURRENT STATUS (WIP)	Rehabilitation of the Factory Buildings and Machineries, with production of basic post-harvest machineries and spare parts using private foundry such as; wood working machines; URSUS tractor trailers with capacity of 2.5 and 5 tons and rims plates; maize milling machines and hullers; and spare parts for industrial and transportation uses.
	PREFERRED MODE OF INVESTMENT	Develop, own and operate
	NO. OF JOBS TO BE CREATED	250 Direct jobs
	CONTACT PERSON	Managing Director, National Development Corporation, P.o.box 2669, Dar es salaam

S/N	ITEM	REMARKS
03	PROJECT NAME	MODERN MEAT PROCESSING PLANTS
	IMPLEMENTING AUTHORITY	Vijana Development Cooperation Ltd (VIDECO)
	PROJECT SITE	Dodoma
	PROJECT COST ESTIMATES	Dodoma Meat Processing Plant USD \$20.8million
	MODE DESCRIPTION	UVCCM has already conducted a feasibility Study for establishment of meat processing plants in Dodoma which has proved commercial feasible taking into consideration the growing demand of processed beef in the Country. The project will comprise three integrated main investments components namely:- <ul style="list-style-type: none"> i) Feedlots and back grounding ranches ii) Slaughter houses iii) Packaging and distribution
	MODE OF COLLABORATION WITH	Joint Venture Partnership
	PROJECT LOCATION	Dodoma
	PROJECT BENEFITS	It is estimated that the project will generate USD \$74.6 million per annum and provide employment to 1000 individuals
	PROJECT SITE	The total Size of land proposed for the project is 5,000 acre
	PROJECT STATUS	<ul style="list-style-type: none"> • Feasibility Study in Place
	CURRENT STATUS	Looking for investors to partner with in implementation of the project under Joint Venture
CONTACTS	Hon GALILA R. WABANH'U. Telephone+225 715 916592 23galila@gmail.com	

S/N	ITEM	REMARKS
04	PROJECT TITLE	TAMCO INDUSTRIAL ESTATE - KIBAHA TEXTILE SPECIAL ECONOMIC ZONE (SEZ)
	IMPLEMENTING AUTHORITY	National Development Corporation (NDC)
	PROJECT DESCRIPTION	<p>TAMCO Industrial Estate is located in Kibaha District; Coast Region along Morogoro Road, it is 40 KM from Dar es Salaam Port. The Estate requires basic supporting infrastructures, such as internal roads, power sub-station, oxidation pond for wastewater, and water tank reservoir. For this industrial park/estate to be more attractive to investors, it will require industrial sheds structures for readymade investors to install equipment and machines and start productions.</p> <p>The TAMCO Estate has a Total area of 201.63 Acres demarcated into four zones namely ;</p> <ul style="list-style-type: none"> i. Pharmaceuticals and medical facilities Industries - 43.04 Acres (22%) ii. Motor vehicle and Equipment Assembly - 54.8 Acres (27%) iii. Textile and Apparel Industries - 77.41 Acres (38%) iv. Industrial services 26.37 Acres (13%) <p>The area for Textile and Apparel Industries has a complete Master Plan, and the costs for developing the entire zone are well articulated.</p>
	DEVELOPMENT PLAN	NDC has planned to install all the basic infrastructures required to provide services to the upcoming industries. In the meantime about 1 KM out of 4 Km of tarmac road has been constructed, the plan is to secure additional financing for finalising the remaining 3 Km as well as financing for oxidation ponds, power substation and clean water reservoir tank in order to catalyse industrial development.
	PROGRAMME ALLOCATION	Central Development Corridor
	ECONOMIC SECTOR	Manufacturing
	EST CAPEX VALUE FOR REVIVAL (\$US MILLIONS)	Total is 78.85Millions USD (\$) for Kibaha Textile SEZ (Textile and Apparel)
	PROJECT STAGE	Mobilisation of funds for finalization of Construction of basic infrastructures
	CURRENT STATUS (WIP)	Finalization of construction of 1 KM tarmac road, construction of URSUS Tractor assembling plant and consultancy service for establishment of power substation and dedicated water pipeline.
	PREFERRED MODE OF INVESTMENT	Leasing of industrial plots and sheds
	NO. OF JOBS TO BE CREATED	38,400 jobs.

S/N	ITEM	REMARKS
05	PROJECT NAME	KMTC INDUSTRIAL PARK
	IMPLEMENTING AUTHORITY	National Development Corporation (NDC) and Partners
	LOCATION	Moshi Town along Moshi Arusha highway
	SHORT DESCRIPTION	Kilimanjaro Machine Tools Manufacturing factory was established to manufacture metal working tools and wood-working machines. Apart from KMTC there is a vacant area of 229.13ha which need to be developed. NDC is looking for a strategic investor to partner with in developing the vacant land adjacent to the factory building.
	PROJECT BENEFITS:	<ul style="list-style-type: none"> ✓ Establishment of Industrial parks will bring different industries in the country. ✓ Balance of payment ✓ Foreign direct investment ✓ Creation of employment and reduction of poverty
	PROJECT COST ESTIMATES:	To be determined after preparation of Business plan
	PROJECT STATUS	NDC is in the process to undertake Cadastral Survey of the plots at KMTC for the 229.13ha to enable the corporation to allocate the plots to interested investors.
	FINANCING STATUS	NDC invites investors for implementation of the project on PPP arrangement.
	CONTRIBUTION TO INCOME GENERATION AND/OR POVERTY ERADICATION	Through employment creation and government revenue.

S/N	ITEM	REMARK
07	Project Name	SISAL AND JUTE BAGS MANUFACTURING
	Implementing Authority	TANZANIA FEDERATION OF COOPERATIVES LTD
	Location	The project area will be located at Nyerere Road-Banda la Ngozi Industrial Area, Dar es Salaam Region.
	Short project description	<p>For many years Cooperative Societies have been the main importers of jute bags for products storage. The demand of jute bags went high immediately after the collapse of sisal sacks industries in early 1990's</p> <p>The cashew nuts producers only imported around 14.4m to 15m pieces of jute bags last year. There is a high demand of sacks for cotton, coffee, and tobacco producers. With the increase of sisal production which is the main raw materials for sacks manufacturing, the available market and absence of any industries producing sisal sacks, gives an opportunity for prospective investors to invest in the industry.</p>
	Project Benefit	<ul style="list-style-type: none"> ✓ Improvement of farmers livelihood ✓ Increase of house hold income ✓ Employment creation ✓ Improvements and stabilization of national favorable balance of payment
	Project Cost estimates	To be established.
	Project status	Business plan in place. Industry buildings available,
	Project Financing Mode	Long term loan and Cooperative Unions investment
	Description of Partnership requirement	TFC invites investors for implementation of the project on PPP arrangement or any other arrangement suitable for both parties.

08	PROJECT NAME	FERTILIZERS MANUFACTURING INDUSTRY.
	IMPLEMENTING AUTHORITY	Njombe Region Cooperative Union.
	LOCATION	Njombe.
	SHORT PROJECT DESCRIPTION	<p>Farmers through their respective organized cooperative societies have been depending much of the imported fertilizers than locally produced one. The use of fertilizers has been one of the important factors for farmers to improve their production yields once used properly.</p> <p>TFC believes the total transformation of the agriculture sector will only be possible if majority of farmers shall be able to obtain fertilizers timely, at their quantity requirement and at a very minimal prices. This will only be attained once we fully utilize the opportunity of setting up a full flaged fertilizer manufacturing plant.</p>
	PROJECT BENEFIT.	<ul style="list-style-type: none"> ✓ Employment creation ✓ Revenues to cooperatives and government ✓ Increase of crops production hence increase of farmers' incomes ✓ Savings on foreign currency expenditure
	PROJECT COST ESTIMATES.	To be established
	PROJECT STATUS	Land for the project is available.
	PROJECT FINANCING MODE	Long term loan and partners contribution.
	DESCRIPTION OF PARTNERSHIP REQUIREMENT	TFC invites investors for implementation of the project on Long term loan, PPP arrangement or any other arrangement suitable for both parties.

AGRICULTURE AND AGROPROCESSING

AGRICULTURE AND AGROPROCESSING

S/N	ITEM	REMARK
01	PROJECT NAME	RUIPA SUGAR PROJECT
	IMPLEMENTING AUTHORITY	Sugar Board of Tanzania
	LOCATION	The project area covers Namwawala, Kisege, Mbingu and Mofu villages in Kilombero District, Morogoro Region. The physical location is astride the Ruipa River in Kilombero Valley, whilst the project site is situated along TAZARA Railways approximately 360 Km South East of Dar es Salaam City. It is also accessible by tarmac road from Dar es Salaam to Kidatu about 360 Km, then 100 Km un tarmac road from Kidatu to Ifakara and linked up by 50 Km of murrum road from Ifakara to Ruipa.
	SHORT DESCRIPTION	The total area to grow sugarcane is 13,950 hectares (including out growers' farms). The area has high irrigation potential from the Ruipa and Londo Rivers. The appropriate size of Ruipa Sugar project is the one with production capacity of 100,000 tons of sugar per annum expandable to 200,000 tons per annum. The fore seen products are raw and white sugar, bio-ethanol, co-generation and molasses.
	PROJECT BENEFITS	The project is vital for sugar supply to the local Tanzania market with potential to supply the East African Community and Great Lakes region with population estimated at more than 300 million. In the project locality, more than 5,000 out growers' famers will have their livelihoods transformed through sugarcane cultivation and engagement to the project. In that case indirect employment estimated to be 25,000 people in the nearby vicinity of RUIPA valley. Sugar production estimated to be 100,000 tons per annum to cater for southern highlands region demand.
	PROJECT COST ESTIMATES	US\$ 200 million
	PROJECT STATUS	Feasibility study done earlier requires some review to establish the new emerging issues, soliciting for Strategic investor
	FINANCING MODE	FDI, Loans and/or Equity sharing
	DESCRIPTION OF PARTNERSHIP REQUIRED	Joint Venture

02	PROJECT NAME	GREENHOUSES CONSTRUCTION, HORTICULTURE AND TRAINING
	IMPLEMENTING AUTHORITY	Vijana Development Cooperation Ltd ((VIDECO)
	LOCATION	Ihemi-Iringa Rural, Iringa Region and Tunguu Zanzibar
	ACCESSIBILITY	Alongside Tanzania - Zambia road, 30km from Iringa town and only 3 km from Ifunda town centre.
	PROJECT DESCRIPTION	<p>The project will involve training youths on how to construct Greenhouse and Plant Management. About 1000 greenhouses are intended to be constructed and three of them are already in place. Also 300 youths have been trained on how to construct greenhouses. This project involves establishing workshop for greenhouses construction and training for youths. The IHEMI site has all other infrastructure including electricity and irrigation system.</p> <p>The project will provide sustainable market supply of horticulture, youth training, direct and indirect employment and will generate income for re-establishment of the same project in all Tanzania main zones.</p>
	DEVELOPMENT PLAN	Starting with youth training on construction and plant management, constructing the 1000green houses sized at least 8m x 30m, and produce seeds, vegetables and other greens. This will produce at least 60000tones of vegetable annually. And about 3000 people will benefits from the project on training and employment.
	MODE OF COLLABORATION	Partnership
	FINANCING STATUS	The company has started construction of three greenhouses and offered training to about 300 youth. The company is seeking fund for project expansion.
	PROJECT SITE	The site has 1963 Acreage with three big water pools. The land is greenish with very suitable climate and soil.
	PROJECT COST ESTIMATES	About \$20 Million is required for training, construction and production as well as implementation of the project in other 8 regions including Zanzibar

03	PROJECT NAME	FISH FARMING
	IMPLEMENTING AUTHORITY	Vijana Development Cooperation Ltd ((VIDECO)
	LOCATION	Dabalo Chamwino Dodoma and Katunguru Sengerema
	PROJECT SITE	About 50 Acre are set for the project and at least 1% of the Dabalo Dam is offered for this project
	PROJECT DESCRIPTION	This project involves training youth on fish caging and farming in a modern technology.
	DEVELOPMENT PLAN	Research and analysis of the project have been done and it is confirmed to be viable. Initial training on cage making have been undertaken. Pilot cages are already installed. The plan involves installing at least 1000cages at Dabalo and 5000cages at Katunguru Lake Victoria as well as construction of the fish processing factory, hatchery, fish feed making plant and construction of cold rooms on both sites,
	MODE OF COLLABORATION	Joint Venture Partnership.
	FINANCING STATUS	UVCCM has done all preliminary activities and is looking forward expanding the projects and training.
	PROJECT COST ESTIMATES	About \$50 Million is required for training, fish cage making, fish feeds production, fish fingerings and fish processing plant.
CONTACTS	Hon. GALILA R. WABANH'U. Telephone+225 715 916592 Email: 23galila@gmail.com or videco2020@gmail.com

04	PROJECT NAME	BEE KEEPING PROJECT
	IMPLEMENTING AUTHORITY	Vijana Development Cooperation Ltd (VIDECO)
	LOCATION	Ihemi Iringa and Manyoni Singida
	ACCESSIBILITY	It is along Tanzania-Zambia Road. Accessible with tarmac Road
	PROJECT DESCRIPTION	The IHEMI forest land provide amiable environment for bees to grow. This offers opportunity to plant unlimited number of beehives. To this effect, the company is planning to make at least 20,000 Beehives. These beehives will be supplied to youth at least 100 beehives to every district. The project involves training youth on how to make beehives, bee planting and bee products harvesting. This project will involve building processing factory and branding for domestic and export market.
	PROJECT COST ESTIMATE	USD 7million

DEVELOPMENT PLAN	The project has started with training and piloting with 300 beehives. One year study will end on June 2020. Then will be followed by expansion and establishing beehives making workshop.
MODE OF COLLABORATION	Partnership
FINANCING STATUS	Partly we have started the project on first phase on construction and Beehives making training. The need for investors and Partners arises from the expansion preferences. Thus we are willing and ready to work with investors.
CONTACTS	Hon GALILA R. WABANH'U. Telephone +225 715 916592 E:Mail: 23galila@gmail.com or videco2020@gmail.com

S/N	ITEM	REMARK
06.	PROJECT NAME	ESTABLISHMENT OF MULTIPURPOSE CENTRE FOR BEE KEEPING VALUE CHAIN.
	IMPLEMENTING AUTHORITY	Tanzania Federation of Cooperatives
	LOCATION	Pilot project in five bee keeping favoring regions (Singida, Dodoma, Morogoro, Njombe and Tabora)
	SHORT PROJECT DESCRIPTION	<p>The projects aims at establishing bee keeping sites, beehives making factory, bee waxes processing factory, honey processing factory, research and training centre in Dodoma region.</p> <p>Tanzania has many bee keepers located in different parts of the country, however very few are doing value chain on bees products and hence majority of these bees products are being thrown away. TFC feels that there is a need to mobilize the bee keeping value addition in one stop centre where all activities included in the value chain will be carried and monitored in one centre.</p>
	PROJECT BENEFIT.	<ul style="list-style-type: none"> ✓ Increased production of bee products ✓ Employment creation ✓ Revenue to the Government ✓ Increase in production ✓ Employment creation ✓ Increase environmental protection and pollinations
	PROJECT COST ESTIMATES.	To be established.

S/N	ITEM	REMARK
07	PROJECT NAME	COCOA PROCESSING FACTORY
	IMPLEMENTING AUTHORITY	TFC and Cocoa Farmers' Cooperative Union
	LOCATION	Kyela District in Mbeya Region.
	SHORT PROJECT DESCRIPTION	<p>Cocoa production in Tanzania, began in the late 1960s, yet has not been significantly promoted or developed as a cash crop in the past 40 years. With the rising global demand for cocoa, and West Africa encountering challenges in its cocoa production, buyers have reconnected with Tanzania's cocoa producers. The government of Tanzania has developed strategies for National Cocoa production which aimed at transforming the Tanzanian Cocoa sector to ensure its continued growth, environmental sustainability, social wellbeing of cocoa growers and their communities.</p> <p>The strategy will only be achieved if the efforts is being undertaken to invest in cocoa value addition by establishing cocoa processing factories instead of depending on exporting cocoa beans only. It's because of this potentiality Tanzania Federation of Cooperatives finds that there is a need to take its role and look for potential investors to invest in Cocoa processing which will result in increase in cocoa production.</p>
	PROJECT BENEFIT.	<ul style="list-style-type: none"> ✓ Employment creation ✓ Enhance social and economic activities ✓ Revenue to the Government ✓ Increase in production
	PROJECT COST ESTIMATES.	To be established
	PROJECT STATUS.	Organized cocoa farmers through Primary Cooperative Societies
	PROJECT FINANCING MODE.	Long term investment
	DESCRIPTION OF PARTNERSHIP REQUIREMENT	Joint venture.

08	PROJECT NAME	COOPS AGRO-CASHEW PROCESSING CENTRE FOR ECONOMIC DEVELOPMENT.
	IMPLEMENTING AUTHORITY	Cashew nut Cooperative Unions and Cooperative Federation.
	LOCATION	Mtwara / Lindi.
	SHORT PROJECT DESCRIPTION	Tanzania being among the producers of cashew nuts in the world, so far has no any remarkable industry for cashew nut processing despite of the available potentials and opportunities in the sector. The Cooperative unions implementing the project aim at establishing a factory capable of meeting requirement of European Union markets. The factory will transform raw cashew nuts into cashew kernels by 30-35% value added. United States and UE on the other hand are the biggest demanding consuming market, whereby around 40% of shelled cashews is imported by US only.
	PROJECT BENEFIT.	<ul style="list-style-type: none"> ✓ Employment creation. ✓ Enhance social and economic activities. ✓ Revenue to the Government.
	PROJECT COST ESTIMATES.	To be established.
	PROJECT STATUS	Cashew nuts primary cooperatives unions and societies are in place.
	PROJECT FINANCING MODE	Long term investment.

S/N	ITEM	REMARKS
0 1	PROJECT NAME	ENGARUKA SODA ASH PROJECT
	IMPLEMENTING AUTHORITY	National Development Corporation (NDC)
	LOCATION	Engaruka Basin is located in northern part of Tanzania about 190 km north-west of Arusha Town, Monduli Districts Arusha Region. The Basin is located about 58 km south-east of Lake Natron in the East Africa Rift Valley System.
	SHORT DESCRIPTION	NDC has conducted a drilling exploration and preliminary brine simulation at the Engaruka Basin. The initial estimate of the resource at the Engaruka Basin is 4,680,000,000 m ³ of brines. This brine is being replenished at a rate of 1,875,000 m ³ /year. Pursuant to the outcome of the above studies, the Government of the United Republic of Tanzania (URT) has entrusted NDC to fast track utilization of this resource for creation of formidable base for the development of chemical industry in the country. NDC plans to establish an extraction soda ash plant at Engaruka with minimum capacity of 1.0 million tons per annum. The establishment will include also construction of associated infrastructure for the said project. The construction of the soda ash extraction plant will devolve on the outcome of the techno-economic study. The soda ash is targeted to satisfy the local requirements of soda ash and the balance will be exported through Tanga port.
	PROJECT BENEFITS	<ul style="list-style-type: none"> ✓ To open up the Tanga Development Corridor ✓ To stimulate establishment of a chain of World class chemical industries in the country ✓ Creation of employment and reduction of poverty ✓ To position Tanzania to trade into the region and globally ✓ Increase balance of payment in the country
	PROJECT COST ESTIMATES	To be determine by the ongoing Techno-economic study
	PROJECT STATUS	Techno-economic study including ESIA is being conducted and expected to be completed by June 2020.
	FINANCING STATUS	Financing for the project is being sought through PPP/JV arrangement
CONTRIBUTION TO INCOME GENERATION AND/OR POVERTY ERADICATION	Value addition and downstream processing of soda ash to produce various chemical products for domestic and export market, hence income generation and creation of employment.	

DESCRIPTION OF THE NATIONAL/REGIONAL CHARACTER OF THE PROJECT	Creation of regional industrial and chemical processing centre in Tanga Development Corridor (TDC)

S/N	ITEM	REMARKS
01	PROJECT NAME	SINGIDA WIND POWER PROJECT
	PROJECT CODE	PT 3162
	IMPLEMENTING AUTHORITY	Geo Wind Power Tanzania Ltd (Geo Wind)
	LOCATION	Within Kisasida, Mughamo and Unyankhanya Villages in Singida Rural District, 12km East of Singida Municipality – Singida Region, Central Tanzania
	SHORT DESCRIPTION	<p>Project is being implemented by Geo Wind Power Tanzania Ltd, a Joint Venture Company incorporated by National Development Corporation 60%, TANESCO 20% and Power Pool East Africa Ltd (PPEAL) 20%. Phase I project development will involve commissioning of a 50MW Wind Farm consisting of wind turbines, cabling works installed for collection of power and transmission to the nearby 220kV customer substation located at the wind farm. The HV customer Substation will step up the voltage from 33 kV to 220 kV and finally transmission to Grid substation located at Singida, 12km away. Reactive Compensators will be installed to control the reactive power.</p> <p>✓ The wind farm will also be provided with paved access roads with total length of 17km and a waste disposal area. A green belt will be maintained within the wind farm to protect the environment.</p>
	PROJECT BENEFITS	<ul style="list-style-type: none"> ✓ Increase power consumption per capita in the country ✓ Project will improve Tanzania's current power MIX by utilizing natural wind resources for sustainability ✓ The project will facilitate better management of water reservoirs in the hydro system; ✓ It will offer environmentally sustainable clean energy project for the country to attract Carbon Credit; ✓ Significant reduction of cost will be realized by replacing imported fuel required to run diesel/HFO engines in emergency power plants; ✓ Job creation to indigenous Tanzanians, small business entrepreneurship and increased Government revenue through various taxes; ✓ The project will bring new skills and expertise in the wind power technology, first ever in Tanzania.
PROJECT COST ESTIMATES	US\$ 136 million	

PROJECT STATUS	Feasibility Study completed including the updates of the study. Secured permits and licenses for power generation including PPA for 50MW. Currently, the Project Proprietor is looking for finance to implement the project.
DESCRIPTION OF PARTNERSHIP REQUIRED:	Public Private Partnership (PPP)
CONTRIBUTION TO INCOME GENERATION AND/OR POVERTY ERADICATION	Through employment creation and government revenue.
DESCRIPTION OF THE PROJECT IN RELATION TO POWER SECTOR EXPANSION PLAN	Project was included in Power System Master Plan since (2012) to generate 50MW by 2014/15 and also included in the Big Result Now (BRN) Initiative.

0 2	PROJECT NAME	SINGIDA SOLAR POWER PROJECT - 100 MW
	IMPLEMENTING AUTHORITY	National Development Corporation (NDC) and Partners
	LOCATION	The project is located at Unyianga Village, 14km West of Singida Municipality along the Singida- Mwankoko Road, 700 km from Dar es Salaam.
	SHORT PROJECT DESCRIPTION	The objective of the project is to establish a solar farm for power generation of 100MW and supply to the National Grid. Pre-Feasibility Study was completed in 2015 and several reviews were made while full feasibility study and updates was completed in October 2017. ESIA Report was completed in March 2017 while the ESIA Certificate was issued in July 2017. Both studies have shown that the project is economically/Financially viable and Environmentally sustainable. About 569 ha of land have been identified for development of this project while arrangements for acquiring 150 Ha of land are at an advanced stage.
	PROJECT BENEFITS	<ul style="list-style-type: none"> ✓ Increase power consumption per capita in the country ✓ Project will improve Tanzania's current power MIX by utilizing natural solar resources for sustainability; ✓ It will offer environmentally sustainable clean energy project for the country to attract carbon credit; ✓ Significant reduction of cost will be realized by replacing imported fuel required to run diesel/HFO engines; ✓ Job creation to indigenous Tanzanians, small business entrepreneurship and increased Government revenue through various taxes; ✓ The project will bring new skills and expertise in the solar power technology, first ever in Tanzania
	PROJECT COST ESTIMATES	Project cost has been estimated at USD 126 Million
	PROJECT STATUS	RFP document has been issued to 18 companies for preparation of detailed proposals to generate a total of 150MW.
FINANCING STATUS	Financing arrangements for the first 50MW is required.	

	FINANCING STATUS	Financing arrangements for the first 50MW is required.
	CONTRIBUTION TO INCOME GENERATION AND/OR POVERTY ERADICATION	Harnessing wind energy for clean and sustainable power generation to supply to National power grid will generate income and employment of local labour, hence poverty eradication as well as expanding Government revenue through taxes and other incomes.

S/N	ITEM	REMARK
02	PROJECT NAME	OFFER FOR SALE OF PROPERTY SUITABLE FOR DEVELOPMENT OF A LUXURY TENTED LODGE
	IMPLEMENTATION AUTHORITY	Lake Manyara Tourist Resort Limited (LMTR)
	PROJECT LOCATION	The property is located in ChemiChemi -Kilimamoja village only 3.5km off the Makuyuni-Karatu highway after Mto wa Mbu in Karatu District.
	SHORT DESCRIPTION	The business idea for development of a 40-Room high-class hotel on the property in the Lake Manyara area of Northern Tanzania was conceived by Eng. Lambert W. Ndiwata in 2005, and the company LMTR was formed in February 2006 as a vehicle for the development of the luxury lodge. The property is in the Lake Manyara area of Northern Tanzania, an area keenly sought after by potential investors in the hotel and lodges industry. LMTR shareholders are seeking buyers to purchase the property including the land for the development of the lodge "as is" and on the "willing buyer, willing seller" basis.
	PROJECT BENEFITS	It has already been established that investing in a hotel business in the Lake Manyara area of Northern Tanzania would be a profitable investment that would realise significant returns on the investment within a short period of time.
	PROJECT COST ESTIMATES	Considering that LMTR had incurred significant value addition costs on the property including All preparatory stages covering important studies and designs, obtaining the Environmental Impact Assessment Certificate for the proposed Project, Water Use Permit from the Internal Drainage Basin Water Board, etc. the 7-acre property is being offered at a negotiable price of US\$ 300,000.
	PROJECT STATUS	A lot of preliminary work has been done on the site including survey works, environmental impact assessment, preparation of feasibility studies and a business plan for the development of a luxury tented lodge, all the Architectural, Electrical, Mechanical, Water Supply Sewage and Plumbing, designs. Water and electricity supplies are available or within easy reach. The EIA Certificate and the Water Use Permit from the Internal Drainage Basin Water Board have been granted. The costs of the preliminary work were financed from LMTR shareholders contributions.
	FINANCING MODE	The property is available for sale
	DESCRIPTION OF PARTNERSHIP REQUIRED	The property is available for sale.

04.	Project Name	ESTABLISHMENT OF COOP API-TOURISM CENTERS FOR YOUTH DEVELOPMENT
	Implementing Authority	Tanzania Federation of Cooperatives.
	Location	Pilot project in five bee keeping favoring regions (Singida, Dodoma, Morogoro, Njombe and Tabora)
	Short project description	<p>Api-tourism is an alternative form of tourism linked to the art of beekeeping and the life of the bee. This particular form of tourism offers unique experiences to tourists directly related with nature. The story about the bee and the synergies of nature, which can be transmitted within a natural landscape in a unique way by a beekeeper, creates an authentic tourist product.</p> <p>Visiting an apiary, observing the honey bee colonies in their natural environment, apiculture museums, honey tasting, candle making workshops, apitherapy, walks in bee friendly gardens, are some of the activities of api-tourism. The above mentioned activities provide to visitors, knowledge and familiarization with the importance of bees in nature.</p> <p>In Tanzania we have many bee keepers located in different parts of the country, however we have none of them doing api-tourism.</p> <p>The project is thought to attract many young graduates to join in because of its nature which attract immediately cash and high interactions with tourists. It's because of these potential TFC sees the project is feasible and ideal for investment.</p>
	Project Benefit.	<ul style="list-style-type: none"> ✓ Increase environmental protection and pollinations ✓ Employment creation to fresh graduates ✓ Young family livelihood improvement ✓ Promotion of tourism and attract foreign currency ✓ Easy adoption ✓ Enhance social and economic activities. ✓ Revenue to the Government.
	Project Cost estimates.	To be established.

10	PROJECT NAME	CONSTRUCTION OF WEIGHBRIDGES -WEIGH IN MOTION (WIM) ALONG THE TRANSIT CORRIDORS AT MIKUMI (MOROGORO) AND MWENDAKULIMA (SHINYANGA)
	IMPLEMENTATION AUTHORITY	Ministry of Works, Transport and Communications through the Tanzania National Roads Agency (TANROADS)
	LOCATION	Mikumi (Morogoro) and Mwendakulima (Shinyanga)
	SHORT DESCRIPTION	Weighing cargo trucks at the fixed weighbridges contribute to delays and hence increase in transport time and cost. The WIM systems are an appropriate tool in assisting the enforcement agencies in preserving road infrastructure from premature deterioration and enhance safety of other road users.
	THE PROJECT BENEFITS	Installation of Weigh In Motion (WIM) weighbridges along the transit corridors is a remedy to delay constraint. For example installation of Vigwaza WIM along the central corridor that has been completed has resulted to reduced weighing time per vehicle from 1.5 – 2 minutes to 30 seconds. It is expected that installation of WIM at Mikumi (Morogoro) and Mwendakulima (Shinyanga) will reduce travel time waste and operating cost and hence profit to transporters.
	PROJECT COST ESTIMATES	USD 1.94 million.
	PROJECT STATUS	Currently, Feasibility study for Mikumi WIM is under World Bank Finance. Mwendakulima project area for implementation has been identified.
	FINANCING STATUS	There is no financing commitment for construction and supervision
	CONTRIBUTION TO INCOME GENERATION/ OR POVERTY ERADICATION	Through employment creation and Government revenue.
	DESCRIPTION OF THE REGIONAL CHARACTER OF THE PROJECT AND BENEFITING COUNTRIES:	This project is along the central corridor which links with neighbouring countries of Rwanda, Burundi, DRC and Uganda.
	DESCRIPTION OF PARTNERSHIP REQUIRED:	Joint financing of Construction of Weighbridges - Weigh In Motion (WIM) along the transit corridors at Mikumi (Morogoro) and Mwendakulima (Shinyanga).

12	PROJECT NAME	UPGRADING TO BITUMEN STANDARD OF MAKONGOLOSI – RUNGWA – ITIGI – MKIWA ROAD (378 KM)
	IMPLEMENTING AUTHORITY	Tanzania National Roads Agency (TANROADS)
	LOCATION	Located in Mbeya, Tabora and Singida Regions
	SHORT DESCRIPTION	<p>The road is divided in the following sections:</p> <ol style="list-style-type: none"> i. Makongolosi – Rungwa (183 km), ii. Rungwa – Itigi (195 km) and iii. Itigi –Mkiwa (35 km). <p>The road links Tanzania with Zambia and central corridor which also links Tanzania and neighbouring countries of Rwanda, Burundi and Uganda. This road is approximately 456 km and links the Tanzania- Zambia Highway at Mbeya and Central Corridor at Mkiwa. The project road is located in Mbeya and Singida with a small portion of road section in Tabora regions where it serves a total population of about 4.9 million according to 2002 population census.</p>
	PROJECT BENEFITS	<ul style="list-style-type: none"> ✓ It will reduce vehicle operating costs and traveling time. ✓ Reduce maintenance costs. ✓ Facilitate transportation of food crops to other regions. ✓ Stimulate economic potential of the area. Provide easy accessibility to various social services to the Community along the project area. ✓ Promote trade between Southern regions and Central regions including Zambia.
	PROJECT STATUS	<p>Feasibility study, detailed design and preparation of tender documents for Chunya - Makongolosi – Rungwa – Itigi – Mkiwa (456 km) were completed in 2011 under Government financing.</p> <p>Economic analysis results shows that EIRR is 15.9% indicating that the project is economically viable for upgrading to bitumen standard.</p>
	FINANCING STATUS	The Government of Tanzania (GOT) plans to finance construction of Mkiwa – Itigi – Noranga (Rungwa) section (57 km). The remaining sections (Makongolosi – Rungwa (183 km) and Rungwa – Itigi (195 km) have no financing commitment for civil works
	PROJECTS COST ESTIMATES	It is estimated that US\$ 410 million is required for construction and supervision of this project.
	DESCRIPTION OF PARTNERSHIP REQUIRED	Joint financing for Upgrading of Makongolosi – Rungwa – Itigi – Mkiwa road section (356 km) from the existing gravel to the bitumen standard road.

13	PROJECT NAME	UPGRADING OF KIDATU – IFAKARA – LUPIRO – MALINYI – LUMECHA (486 KM)
	IMPLEMENTING AUTHORITY	Ministry of Works, Transport and Communication (MoWTC) through Tanzania National Roads Agency (TANROADS)
	LOCATION	The project is located in two Regions namely; Morogoro and Ruvuma. It passes through three Districts of Kilombero and Ulanga in Morogoro Region and Namtumbo district in Ruvuma Region.
	PROJECT DESCRIPTION	The Kidatu – Ifakara – Lupiro – Malinyi – Lumecha road (486 km) links the Tanzania-Zambia Highway with Ruvuma region at Mikumi. The existing road is engineered gravel and party earth and presently classified as a trunk road. The width varies from 4.0 to 7.0m and it is passable with difficulties by ordinary vehicle without 4WD during rain seasons.
	PROJECT BENEFITS	<ul style="list-style-type: none"> ✓ It will reduce vehicle operating costs (VOC) and travel time. ✓ Reduce maintenance costs. ✓ It will facilitate transportation of food crops from surplus region of Ruvuma to deficit regions. ✓ It will stimulate economic potential of the area such as coffee, maize, rice, cassava, millet, tourism, bee-keeping, timbering etc. ✓ It will provide easy accessibility to various social services such as schools, health and market centers to the Community along the project area. ✓ The road will enhance inter-regional and Regional economic integration.
PROJECT STATUS	<ul style="list-style-type: none"> ✓ Detailed Engineering Design and preparation of Tender Documents for upgrading to bitumen standard of the Kidatu – Ifakara – Lupiro – Malinyi – Lumecha road were completed in 2016 under AFDB funding. ✓ Works for upgrading of Kifatu – Ifakara Section (67.9 km) is in progress under EU/USAID/DFID financing ✓ There is no financing commitment of the remaining road section. 	

	ECONOMIC JUSTIFICATION	<ul style="list-style-type: none"> ✓ The Kidatu – Ifakara – Lupiro – Malinyi – Lumecha road links with TANZAM Highway on one part and the Mtwara Development Corridor through Songea town on the other part. A paved road which starts from Mtwara Port to Mbambay Bay port that links Tanzania and Malawi connects the Mtwara Development Corridor and serves the Southern Agricultural Growth Corridor of Tanzania (SAGCOT). Construction of the road to bitumen standard is therefore economically justifiable. ✓ Upgrading of the Kidatu – Ifakara – Lupiro – Malinyi – Lumecha section will increase economic viability of Kilombero Bridge. ✓ Will reduce vehicle operating costs and travel time. ✓ Will facilitate transportation of goods and services ✓ Will enhance inter regional and Regional Integration.
	PROJECTS COST ESTIMATES	The estimated costs for construction of the Ifakara – Lupiro – Malinyi – Lumecha road (418 km) for DSD option are US\$ 390 million.

S/N	ITEM	REMARKS
01	PROJECT NAME	DAR ES SALAAM COMMUTER TRAIN SERVICES
	IMPLEMENTING AUTHORITY	Reli Assets Holding Company (RAHCO)
	LOCATION	Dar es Salaam City and neighboring regions
	SHORT DESCRIPTION	<p>The project will involve development, construction and operating a Commuter Train service in Dar es Salaam. The project will cover the central business district (CBD) and its surrounding suburbs of Chamazi, Pugu, Kibaha, Kerege and Bagamoyo.</p> <p>The project will also include supply of modern, adequate and efficient rolling stock, development of dedicated railway infrastructure and routes for commuter trains, development of modern telecommunication and signaling systems, development of trading, service and parking lots along the earmarked network section / lines. Development of Railway Line will provide smooth and fast traffic flow between to and from all destinations with and around Dar es salaam city.</p> <p>Traffic decongestion and provision of cheap, faster and convenient passengers' transportation for the City of Dar es Salaam whose population is growing at about 4.3% p.a. and currently has a population of about 5 million</p>
	PROJECT BENEFITS	<ul style="list-style-type: none"> ✓ Savings in travel time from using the improved transport system; ✓ Improvements in economic productivity of businesses and individuals; ✓ Improvements in safety – fewer injuries lives lost with safer transport; ✓ Improvements in environmental quality as car traffic decongestion will also reduce air pollution; and ✓ Economic benefits will be greatest as created links among regions with national economic base while easing distribution chain
PROJECT COST ESTIMATES	To be established	

PROJECT STATUS	In October 2012 the Government, through Reli Assets Holding Company (RAHCO), Tanzania Railways Limited (TRL) and Tanzania and Zambia Railways Authority (TAZARA) launched the first two route city commuter train services plying between Dar-es-salaam Railway Central station to Ubungo Maziwa and Pugu Mwakanga station to TAZARA station using the existing railway network of RAHCO and TAZARA respectively. Further in August 2016, TRL launched another service from Dar-es-salaam Railway Central Station to Pugu. The services have revealed that despite the old, inadequate and inefficient railway infrastructure and equipment used, there is a dire need for commuter train services in Dar es Salaam as at the moment about 16,500 passengers (on average) per day are transported by the three route commuter train services.
FINANCING MODE	PPP with finance (eg ECP+F)

S/N	PROJECT NAME	DEVELOPMENT OF A NEW MWAMBANI PORT
0 2	IMPLEMENTING AUTHORITY	TANZANIA PORTS AUTHORITY
	ASSOCIATED PROJECT	http://www.au-pida.org/ztk-transmission-interconnector-kenya-section Construction of Tanga – Arusha – Musoma Railways
	PROJECT SUMMARY	<p>The Port of Tanga was investigated and was found to require expansion in order to provide sufficient capacity and capability to meet forecast future demand.</p> <p>Due to the constraints around existing Tanga port, it is recommended that a new port should be constructed in Mwambani bay to the south of Tanga. It is envisaged that the new port would be developed for general cargo, dry bulks and containers, mainly to serve Northern Tanzania and Southern Kenya. A potential site for the new port was identified within the Ports master plan study.</p> <p>The proposed development provides a total of 800m of quay length, allowing for three berths (Nominally 1 container, 1 general cargo and 1 bulk).</p>
	PROJECT DESCRIPTION	<p>The proposed development provides a total of 800m of quay length, allowing for three berths (Nominally 1 container, 1 general cargo and 1 bulk).</p> <p>The main port area comprises of a platform 800m long x 300m wide, aligned approximately perpendicular to the shore. The island is formed using dredged material and protected with riprap or other suitable materials. The inner end is located near the low water line, and the quay wall is located on the northern side. The quay offers three berths for the design vessels, although more, smaller vessels could be accommodated.</p> <p>The dry bulk berth is at the inner end, to minimize the effect of wind-blown dust on the other facilities. The container terminal is at the outer end, and the general cargo facilities in the centre. However, the berths are interchangeable to some extent, for example if two vessels of the same type are in port at the same time.</p>

FINANCING STATUS	<p>PPP financing arrangement is highly recommended.</p>	
CONTRIBUTION TO INCOME GENERATION/OR POVERTY ERADICATION	<ul style="list-style-type: none"> ✓ Creation of direct and indirect employment; ✓ Contribution to the national GDP; ✓ Promotion of small and medium scale enterprises; ✓ Increase in exports and imports traffic to TPA, thus increase in revenue. 	
BENEFICIARY COUNTRIES	<p>Tanzania, Uganda, DR Congo, Rwanda and Burundi</p>	

S/N	ITEM	REMARKS
03	PROJECT NAME	CONSTRUCTION OF NORTHERN STANDARD GAUGE RAILWAYS LINE
	IMPLEMENTING AUTHORITY	Reli Assets Holding Company. (RAHCO)
	LOCATION	Tanga
	SHORT DESCRIPTION	Reli Assets Holding Company plans to construct Standard Gauge Railway line running from Tanga Port. This proposed Standard Gauge Railway line will traverse northern Tanzania corridor from Tanga to Arusha (438km) on existing Right of Way (RoW) to the existing meter gauge and then extend in a green field (616 Km) to Musoma port in Lake Victoria with spurs to Engaruka soda ash mine and Minjingu phosphate mine, the total length is about 1,108 Km.
	PROJECT BENEFITS	<p>Some benefits of the line are transportation of: -</p> <ul style="list-style-type: none"> ✓ Engaruka Soda Ash in Arusha – Tanzania, According to NDC the new soda ash discovery of about 4.68 billion m³ in the Engaruka Basin will make Tanzania one of the largest Soda Ash producers not only in Africa, but globally. ✓ Minjingu phosphate mine ✓ Dutwa Nickel Laterite Project in Tanzania Lake Victoria Zone comprises of two hill top deposits, Wamangola and Ngasamo, which are 7km apart ✓ Tanga Cement Capacity – more than 1.25m tones per year ✓ ARM Cement Ltd (<i>formerly Arthi River Mining</i>) of Maweni Tanga, the cement and lime production plant is expected to produce 2.5 million tons of cement annually. ✓ Sisal, Coffee, Wheat, Beans, Maize and other agricultural produce Forest and Lumbering. ✓ Fishing and fish processing industries. ✓ Tourism in National Parks which include Ngorongoro and Serengeti, Cultural Tourism and Mountains Climbing (Kilimanjaro and Meru), ✓ Ports development projects at Mwambani and Musoma in Tanzania and New Kampala port in Uganda.

PROJECT COST ESTIMATES	To be established.
PROJECT STATUS	Not started
FINANCING STATUS	Public-Private- Partnership (PPP), preferably Engineering, Procurement, Construction and Finance (EPC&F)
CONTRIBUTION TO INCOME GENERATION AND/OR POVERTY ERADICATION	Through employment creation, government revenue, improved service delivery as well as tourism promotion.

0 1	PROJECT NAME	FARKWA DAM – WATER SUPPLY PROJECT
	IMPLEMENTATION AUTHORITY	Government of Tanzania through the Ministry of Water (MoW) in collaboration with Internal Drainage Basin Water Board (IDBWB) and Dodoma Water Supply and Sanitation Authority (DUWASA)
	PROJECT LOCATION	Dodoma Region
	SHORT DESCRIPTION	<p>The project is located in Dodoma Region, central Tanzania, in Internal Drainage Basin at about 130 km from Dodoma City towards Kondoa District. The project is within a semi-arid region of Tanzania which experiences only seasonal rivers/streams with mean annual rainfall from 500mm/year – 900mm/year. The proposed dam construction and conveyance systems project to Dodoma City, Chemba, Bahi and Chamwino District councils has undergone a full Environmental and Social Impact Assessment (ESIA).</p> <p>The aim of the Farkwa dam project is to complement the present water supply to Dodoma City of installed capacity 61,500 m³/day from Makutopola wellfield source and upgrade it to meet the future demand up to 2034 due to miscellaneous expansion of Dodoma City. The Dam is expected to produce up to 128,000 m³/day of water to the City.</p>
	PROJECT BENEFITS	The increasing population in Dodoma City due to the Government activities transfer to city, The Bahi, Chamwino and Chemba Districts councils are expected to be the beneficiaries of this project. Moreover, the project will serve paddy farmers downstream of river Bubu from frequent floods and enhance irrigation activities downstream.

PROJECT COST ESTIMATES	Total cost estimate for the construction including supervision works, RAP, Roads Diversion and Conveyance System is USD 420,000,000 (However the project can be phased into two (2) Lots whereby Lot 1: Construction of Dam (USD 98,525,000) and Lot 2: Conveyance System (USD 321,475,000).
PROJECT STATUS	The Ministry of water (MoW) has recently completed payments of compensation of the dam site, where, a total of TZS 7.8 Billion has been paid. (USD 3,369,330,432)

02	PROJECT NAME	PROPOSED FARKWA DAM CONSTRUCTION AND CONVEYANCE SYSTEM TO DODOMA CITY, CHEMBA, BAH AND CHAMWINO DISTRICT COUNCILS IN DODOMA REGION
	IMPLEMENTATION AUTHORITY	Ministry of Water
	PROJECT LOCATION	Dodoma Region
	SHORT DESCRIPTION	<p>Tanzania Government through Ministry of Water is planning to establish water supply system to Dodoma City, Chemba, Bahi and Chamwino District Councils. The aim is to complement the present water supply to Dodoma city with installed capacity 61,500 m³/day from Makutupora source, and upgrade it to meet the future demand anticipated by year 2035 due to rapid expansion of Dodoma City.</p> <p>The project three key components include; (i) construction of main dam of 32m height and embankment length of 1,185m of composite RCC and earth materials with a capacity of 470 Mm³. (ii) A Saddle dam of 15m height and embankment length of 1,500m composing of earth fill dam materials including divergence paved road of 25 Km length flying over the dam embankment, (iii) conveyance system of 117 km to Dodoma.</p>
	PROJECT BENEFITS	The Project is expected to supply water to Dodoma city and to the recently established Bahi, Chemba, and Chamwino District Councils in order to supplement existing insufficient water supply schemes to these towns. The Dam is also expected to cater for current water demand, livestock, irrigation, small scale industries and other investments.
PROJECT COST ESTIMATES	Total cost estimate for the whole project is USD 473 million.	

PROJECT STATUS	Feasibility study, Detail Design, ESIA, and Tender documents are ready. Economic Viability has been also done where the Project was found viable. Compensation for the communities surrounding the Farkwa Dam has been effected.
FINANCING MODE	Not yet established but concessional loans, DFIs public financing and Government contributions are the expected financiers of the Project
DESCRIPTION OF PARTNERSHIP REQUIRED	Concessional loans, DFIs public financing and Government

03	PROJECT NAME	CONSTRUCTION OF LUGODA DAM AND MALULUMA HYDROPOWER ON NDEMBERA RIVER IN IRINGA REGION
	IMPLEMENTATION AUTHORITY	Government of Tanzania through the Ministry of Water in collaboration with Rufiji Basin Water Board (RBWB).
	PROJECT LOCATION	Iringa Region
	SHORT DESCRIPTION	<p>The Government of Tanzania through the Ministry of Water (MoW) and Rufiji Basin Water Board is planning to construct Lugoda dam and Maluluma Hydro-electric power station on Ndembera River, in Mufindi District, Iringa region.</p> <p>The required storage capacity of the reservoir, has been determined to be approximately 347 million m³, with a normal water level to EL. 1677 m amsl. The reservoir would extend approximately 30km upstream from the dam, and cover an area of approximately 67.1km², at a normal water level of EL. 1677 m amsl. The reservoir will be formed by construction of a dam on the Ndembera River about 1.7 km downstream along the river from the Ndembera Bridge at Lugoda. The dam site for construction of Lugoda dam is located at Lugoda Lutali village in Mufindi district, Iringa Region, approximately 50 km upstream of Madibira town and about 24 km upstream of the Maluluma Falls.</p> <p>The Maluluma HP site is situated on the Maluluma falls on Ndembera River, a major tributary of the Great Ruaha drainage system on western of Makambako.</p>
	PROJECT BENEFITS	Status of the project to date is that detailed design and tender documents are ready prepared.
	PROJECT COST ESTIMATES	Cost estimate for construction of Lugoda dam civil works is about US \$120 M
PROJECT STATUS	Feasibility study, Detail Design, ESIA, and Tender Documents are ready. Project Economic Viability is done where the Project was found viable.	

	FINANCING MODE	<p>Financing modality will be determined as may be agreed during negotiation. DFIs Public Financing and concessional loans are sought.</p> <p>Government of Tanzania will contribute to logistical and facilitation in issues concerning safeguard, communication and counterparts participation during project implementation and compensation of those affected by project.</p>

INFORMATION, CULTURE, ARTS AND SPORTS

INFORMATION, CULTURE, ARTS AND SPORTS

SN	ITEM	REMARKS
01	PROJECT NAME	HOUSE OF CULTURE/CULTURAL COMPLEX
	IMPLEMENTATION AUTHORITY	Ministry of Information, Culture, Arts and Sports(MICAS)
	PROJECT LOCATION	This project is located at Kiromo Bagamoyo, Pwani Region, Plot No. 58.
	SHORT DESCRIPTION	<p>Background</p> <p>The National House of Culture is the project initiated by the Government of Tanzania for the purpose of having an infrastructure which will be used to show case Tanzania's identity and all cultural activities to be under one roof.</p> <p>The idea was developed in the late sixties and seventies, and in 2007 the Ministry of Information, Culture, Arts and Sports acquired land in Bagamoyo District where this infrastructure will be situated.</p> <p>The establishment of this big and significant infrastructure will be relevant to all cultural practitioners and artists because this facility will cater for a diverse number of activities and provide opportunities for cultural interaction, expression and experiences.</p> <p>Rationale</p> <p>The facilities are not found in Tanzania, albeit of the required standard and category. Equipment such as all modern stage lighting and sound equipment are lacking because of these inadequacies, performances, exhibitions, artistic training, preservation activities and the like happen in very inappropriate spaces.</p> <p>Therefore this complex will cover all areas by having buildings with relevant conditions to cover all the needs.</p>
	PROJECT BENEFITS	<ul style="list-style-type: none"> ✓ This project shall have the following benefits: ✓ Increased value added artistic product exhibited in the House of Culture. ✓ Showing of the artists and the art works for business purposes ✓ Employment opportunities for youth artists ✓ A center for tourism ✓ To become a source of revenue to the Ministry and a prospective partner ✓ To provide entertainment services to the community through theatre arts

PROJECT COST AND ESTIMATES	Project completion cost is estimated to be USD 204,333,602
PROJECT STATUS	<p>Prior to implementation of the project, different measures have been taken to initiate this project. The Ministry of Information, Youth, Culture and Sports has already acquired land at Kiromo – Bagamoyo, and other construction activities have been done, such as the feasibility study of the area and drawings of the infrastructures, to mention a few. Those civil engineering activities are done by outsourcing from Ardhi University.</p> <p>1. Implementation plan/schedule</p> <p>PHASE I:- Auditorium, Art Gallery, Police post, Information Centre, Administration block Restaurant. Phase one will accommodate USD 68,444,534, implementation period 4 years.</p> <p>PHASE 2:-</p> <ul style="list-style-type: none"> -Shopping centre - Library - Health centre <p>Phase two will accommodate USD 65,444,534 implementation period 3 years</p> <p>PHASE 3:-</p> <ul style="list-style-type: none"> -Workshop & studios -Cultural theme village -Hotel and Hostel <p>Phase three will accommodate USD 70,444,534 implementation period 3 years</p>

	IMPLEMENTATION AUTHORITY	Tanzania Film Board (TFB)
	PROJECT LOCATION	Chamwino District Council.
	SHORT DESCRIPTION	<p>The potential of film Sector to create more jobs and as a source of industrial growth can be witnessed through the great film industry advances in such Nations as the United States of America where it is the second National Income earner after Military Weapon sales and in Nigeria where it is the second income earner after oil.</p> <p>The construction of this building will offer a space for production house with modern technologies and reduce the production costs approximately up to 60 percent of the present cost, which is too high. The construction will increase foreign currency through foreign film makers entering the country, who will hire props and the available working equipment for their productions.</p>
PROJECT BENEFITS	<p>Upon completion of this project various benefits can be derived directly or indirectly:</p> <ul style="list-style-type: none"> i. The project will increase government revenue from the tolls obtained from the, production house, studios theatre and tourist shops. ii. The project will provide a conducive environment for Film Board staff, government Ministries and Departments authorities (MDA) in terms of obtaining office spaces and conference facilities. Hence, the output from the respective MDAs will be improved. iii. Provide a much need service in the entertainment industry through the advanced technology in the production house and studio. This will help the film practitioners in East and Central Africa to procure the shooting services that they required to procure from South Africa, Europe and America. iv. The project will equally contribute to the attraction of foreign earnings in other sectors such as tourism and hotels. 	

PROJECT COSTS AND ESTIMATES	The total amount estimated to be allocated for the implementation of this project is USD 4,319,654.40
PROJECT STATUS	The Tanzania Film Board has used its own source/fund to purchase a land with 46,080 Square meter at Chamwino district and acquired a title deed for this project construction.
FINANCING MODE	The project is planned to be implemented through own source, government financing and Development Partners assistance (Grant).
DESCRIPTION OF PARTNERSHIP REQUIRED	The Project will be sponsored by the Government of the United Republic of Tanzania and any interested development partner who wish to support the government efforts of improving the film sector.

S/N	ITEM	REMARKS.
02	PROJECT NAME	TANZANIA FEDERATION OF COOPERATIVES INSURANCE SERVICES.
	IMPLEMENTING AUTHORITY	Tanzania Federation of Cooperatives.
	LOCATION	Ushirika Tower, Lumumba Street.
	SHORT PROJECT DESCRIPTION	<p>The cooperative sector is recovering and number of cooperative economic activities is growing covering wide range of economic sectors. Also number of cooperatives members is increasing so fast, especially in rural areas where majority of the population are farmers.</p> <p>Despite of several efforts taken by cooperative societies to invest, most of the investments are at risks because of not being covered by any insurance scheme, as many of the insurance providers do prefer to work only in the urban areas to minimize their operation costs.</p> <p>TFC has the advantage of reaching many people including those in periphery through its cooperative structure, which is interconnected starting from Primary to Federation levels through union's level.</p> <p>TFC therefore intends to engage in providing insurance service from the current brokerage level to Cooperative Insurance level.</p> <p>In order to fast grow the insurance business, TFC is current looking for interested potential investor to invest.</p>
	PROJECT BENEFIT.	<ul style="list-style-type: none"> ✓ Cooperative society and members properties covered against risks ✓ Lifesaving of rural farmers and communities in general through difference coop health insurance schemes ✓ Increase of TFC's and government revenues ✓ Employment creation
	PROJECT COST ESTIMATES	To be established
